NEW: Tomato Seeds

NEWS: Tomato seeds have been added to the english language shop. WE'LL try to translate the descriptions asap.

Important Notice to all US customers!

Some recent shipments to US have been confiscated by USDA and the customers got an empty envelope together with a note that seeds were confiscated because of missing phytosanitary certificate.

We highly recommend to apply for a import permit (small batches of seeds), that can be done online at the **USDA APHIS page** search import permit PPQ 587 - Plants for planting including seeds.

US customers ordering without this certificate declare that shipment is at their own risk and they will not get a refund if the seeds were confiscated!
